

THE INVOICING SOFTWARE FOR THOSE WHO LIKE BILLING BUT NOT SOFTWARE

OZénie is your simple and intuitive solution
for daily management

PLUGIN WORDPRESS & PRESTASHOP

You are a publisher or user of Woo Commerce or Prestashop solutions. Ozenie plugins are to date the only plugins “putting invoices certified by the tax authorities.”

Do not wait any longer ! for 199 euros / year play the peace card and be calm in the face of tax risk and avoid a fine of 7500 euros and often worse consequences.

The principle: once the plugin is installed and configured, each time a basket is validated, the OZénie Plug-in generates and sends an AFNOR-certified invoice to your customer and ensures compliance either by using OZénie or by retrieving the invoices from your accounting software.

Two other WooCommerce Plug-Ins exist and complete our offer.

A first allows to feed the e-commerce site (Photos articles, Categories, Variants, Price ...)

A second add-on allows you to retrieve orders, integrate them into your commercial management and manage your stocks

THE INVOICING SOFTWARE FOR THOSE WHO LIKE INVOICING BUT NOT SOFTWARE

OZénie is your simple and intuitive solution
for daily management

INVOICING BY WEBSERVICES

The OZénie WebService will allow you to integrate NF 525 certified billing directly into your own applications. (Pricing on request)

It is made up of a suite of functions and methods that range from creating the account to generating the invoice and then sending accounting files in the highest market standards (CEGID, Quadra, Ciel, Sage, EBP, etc.).)

Certification becomes mandatory and self-attestation will no longer be authorized as of January 1, 2024.

Eole Concept can also provide all Windev, Windev Mobile or Webdev developers with the kernel and HMI of the NF525 in paid open source, thus saving months of development and understanding in the implementation of this standard.

Implementation: Detailed documentation is provided with the plug-in and our specialists remain at your disposal.
